

Stripes and Curves Workshop

with Daisy Aschehoug

W A R M F O L K

Featuring the Klem Quilt or any project from the book Quilt Modern Curves and Bold Stripes

This materials list is for participants who choose to make the Klem Quilt. Fabric requirements for book projects are listed in the book.

The Klem Quilt is a fun display of dizzying strips and curves. The key to the design lies in high contrast foreground/background fabric choices that let your piecing skills shine. Fabrics that work well for this design will be solids or prints that read like a solid from a distance. If you're excited about a large scale print that has many colors, consider a high-contrast solid to pair with it. The pattern can be purchased prior to the workshop from warmfolk.com.

Quilt size: 48" x 66"

Tools: Cutting mat, rotary cutter, sewing machine, iron, pins.

Optional tools: 28mm rotary cutter, 1/4 inch glue stick from Fons & Porter or Sewline (regular school glue sticks are not precise enough even though the glue is a similar, sticky washable glue).

Materials:

Fabric requirements are based on 40" of usable fabric once selvages are removed.

Pink (foreground): 1 1/4 yards

White (background): 3 yards

Binding: 1/2 yard

Backing: 2 1/2 yards

Batting: 56" x 74"

If you have any questions, please email me at daisy@warmfolk.com. I look forward to seeing you in the workshop!

***BE SURE YOU PRINT TEMPLATES ACTUAL SIZE. Some printers scale to fit the page without being asked to. Many internet browser windows also resize files, so I recommend downloading and opening the file in a PDF reader to print. Use the 1 inch scale box to check that your printer is on the correct setting. Or, measure the straight edge of the convex template; the correct length is 6 1/2".

If you prefer a thicker template, consider glueing template copies to thin cardboard (i.e. cereal box) and then cutting. Your guild may make a group purchase of any-sized acrylic templates here: <https://warmfolk.com/collections/templates/products/template-bundle>

Be sure to manually select the option in your print screen to print "actual size".

If the 1 inch box measures too big or too small, check the printer settings and try again.
